BICHON-ADVANCED HYGIENE (Pillar 5)

Begin grooming with a gentle brush-out to remove loose fur and prevent tangles. Use coat-specific tools and always brush in the direction of growth to ensure comfort and healthy skin stimulation.

Stress-Free Bathing

Bathing should be calm and controlled. Use lukewarm water and pet-safe shampoo, avoiding eyes and ears. Proper rinsing prevents irritation and keeps your dog's skin balanced.

Precision Trimming

Precision trimming around paws, ears, and sensitive areas requires patience and the right tools. Always trim slowly and carefully to avoid cuts or stress.

Spa Finish & Care

Finish grooming with soft towels and light sprays to enhance shine and freshness. This step ensures your dog looks polished and feels relaxed.

Advanced Hygiene

Advanced hygiene includes ear cleaning and dental care. Regular maintenance prevents infections and supports overall health and comfort.

Final Grooming Check

After grooming, check coat smoothness, nail length, and overall comfort. A relaxed and happy dog is the true sign of proper grooming.

Consistency & Routine

Maintain a regular grooming schedule to avoid matting, infections, and discomfort. Consistency ensures long-term health benefits.

Trust & Bonding

Grooming builds trust between you and your dog. Gentle handling and patience strengthen your bond and improve your pet's well-being.
